
Install and use an advanced macro recorder. Enables you to record commands and use them later for repeating tasks. Keyboard macro utility allows you to create macros for all essential windows commands. It features wide options that give you the chance to record the most important operations on your computer, and later restore them. You can record as many functions and commands as you want, and the utility will keep them automatically organized in the list. Moreover, you can choose which program you want to be executed when a macro is pressed. Keyboard macro utility lets you record any command you want, using the included GUI. Just start the application, select the commands you need to record and press the Record button. A progress bar will appear, where you can watch the process and make sure that everything is going smoothly. Once the recording is finished, click the Stop button and choose a name for the macro. If you want to use it, click the Play button, and the application will replay the recorded commands. Keyboard macro is a standalone application, so it doesn't require any kind of third-party applications to operate. The interface is straightforward and easy to use, which is why it became popular with the users of computers with Windows 98 and later. Windows XP, Vista, 7, 8, 8.1, 10 and 2019 Mac OS support.
