How does it work? The innovative system enables players to deliver dynamic, realistic and intense AI-controlled behaviours and reactions to the ball, opponents, teammates, crowd and game situation. For the first time ever, fans can experience realistic, engaging and authentic game play which showcases the individual attributes and unique skills of each player. This new technology also allows for new and improved player control for intelligent, reactive movements to create game-changing shots and goals. Each of the 22 players on the pitch now controls his or her own body parts; This includes facial features, which behave and react in the same way to the player as well as motion capture data that provides a more robust realism - including player collision, tackles, angled shots and accurate passes. The sophisticated behaviour trees and AI in FIFA 22 have been enhanced with 22 refined behaviours to further immerse players into the game environment. The new AI-controlled behaviours enrich player animations and reactions to the ball, supporting players, scoring opportunities, crowd interaction and open the gates to an enriched gaming experience. A fully re-engineered physics system, optimised for realistic, high-intensity gameplay, and complete integration of animations, player behaviours and their responses to in-game events, ensures that tackling, blocking, headers and shots work in the same way as they do in real-life - bringing the action of the global game-changer to the game you love. Expected FIFA titles to be backwardly compatible with FIFA 17, 18, 19, 20, Ultimate Team Seasons, Ultimate Team Champions and Play Now Team Packs when they go live on the Store. SUMMER 2015 FAN FACT-FIED REVIEW "FIFA is a perfect example of how the sports genre has reached such a mainstream position. FIFA is not just a sports game, it is a social experience." - Edge Magazine "FIFA 22 is more 'football.' The simulation elements have been refined, the player modes have been improved and there are more visual effects and animations. It's the first time I felt the game was becoming truly playable - that it was easy to pick up and play. It feels better to play." - Gamespot "There's a seamless blend between the narrative and the gameplay in FUT and the transitions are fast, the graphics sharp and, well, colorful." - Game Informer "FIFA is back and it's confident and at its best in FIFA 22." - PocketGamer
