Have tried several times with both PP2017 and PP2018 but no matter what I do I can not get it to show up under File > Export For... I'm pretty sure it worked with PP2017 on my old computer but on the new one it doesn't, no matter what folder I put it in. The plugin is installed, I can see the files in the folder and the folder is being searched by PP, but it won't show up anyway. And yes, I have tried different folders and I have made sure they are being searched. 32-bit suite on Windows 10, 64-bit.
