Cracking Adobe Photoshop is a bit more involved, but it can be done. First, you'll need to download a program called a keygen. This is a program that will generate a valid serial number for you, so that you can activate the full version of the software without having to pay for it. After the keygen is downloaded, run it and generate a valid serial number. Then, launch Adobe Photoshop and enter the serial number. You should now have a fully functional version of the software. Just remember, cracking software is illegal and punishable by law, so use it at your own risk.

ABOVE: A Silkipix-converted RAW image. (You can see the painted-on, slightly blurry effect in the first three horizontal rows of the file). **BELOW:** A RAW file converted using Lightroom. This is the best the Silkipix RAW converter gets. Not the best by far, but significantly better than what Canon users are getting on their EOS line. Canon's RAW converter is by far the worst I've ever used. Lightroom 6 was released before Adobe switched to a rolling release strategy, and didn't pick up the update until a month after it hit the App Store. But then they crossed their fingers and hoped that, unlike Lightroom 5, they've kept it all together. Not so. Lightroom 6 on the Mac App Store suffered from a long list of rollbacks that replaced changes with reverse changes. Adobe's team has since bounced back, and while they still have a ways to go, Lightroom 6 is now in a much better place.

ABOVE: Lightroom on the Mac app store. There's a fast version for people using the Mac App Store, and a slow version for those who are using the classic Mac App Store, so people can use the one they prefer. But I've heard reports that you can only get the slow version if you have an unlimited profile. Did Adobe beat them to the punch? They also inject the Lightroom app with Apple's Eye-Triggered Face Tracking, which means you will get even faster Face Recognition when you create projects. It's proprietary, but it's definitely a cool trick. The latest update made it possible for you to import video (as long as it's in MP4 with a.mov extension).
